About us

Table tennis products available worldwide and with over 50 years of expertise, Lion is a trusted brand for top athletes as well as for leisure players. Our team of experts develop and work with current technologies to offer the latest innovations in table tennis.

Head office is centrally located in Hong Kong closely working with our factories in Zhongshan, China. We employ over 400 staff working on design, manufacturing and production.

CONTENTS

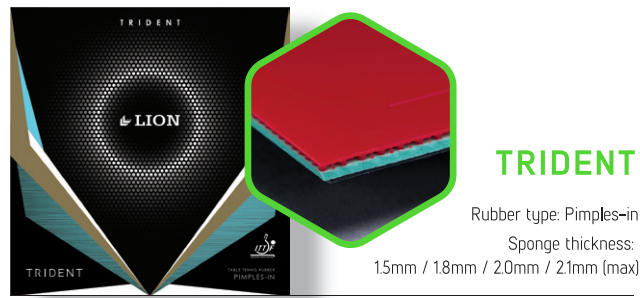

**ISPO
Munich**

Annually we participate in ISPO, an international sports fair held in Munich, to exhibit latest Lion products and innovations.

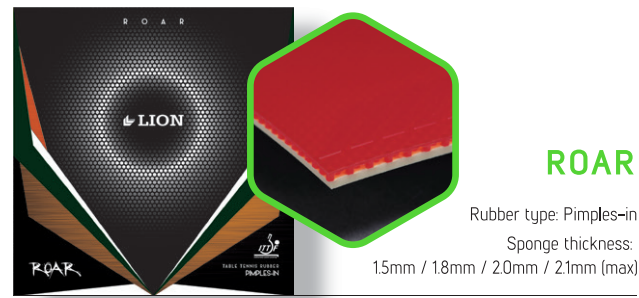

1. Rubber	04-05
2. Blade	06-10
3. Rubber Bat	11-35
4. Outdoor Bat and Set	36-37
5. Table Tennis Set	38-39
6. Table Tennis Ball	40-41
7. Net Post Set	42-43
8. Bag and Accessory	44-45
9. Table	46-47

TRIDENT

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

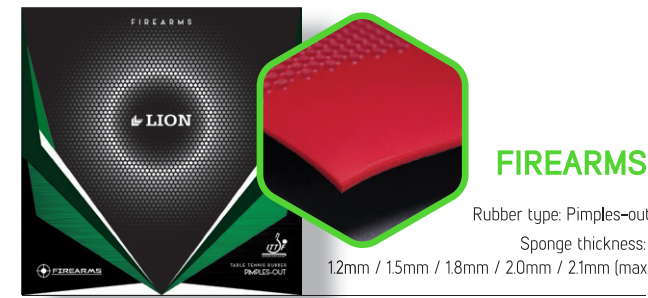

- Combined with a special synthetic material in the rubber formula to provide a strong elasticity to the rubber.
- Result in an amazing spin & speed.
- Player is able to perform topspin with a precise curved trajectory.

ROAR

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

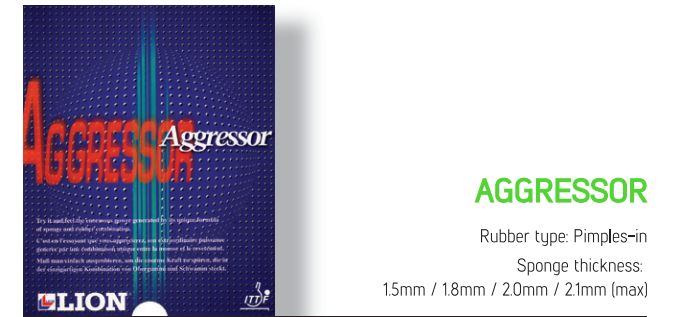

- 'EZLASTIC' technology: The pimples can bend to its maximum degree to absorb the energy of the coming ball and then push the ball away using the absorbed energy.
- An amazing offensive rubber for making powerful strike.

FIREARMS

Rubber type: Pimples-out
Sponge thickness:
1.2mm / 1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

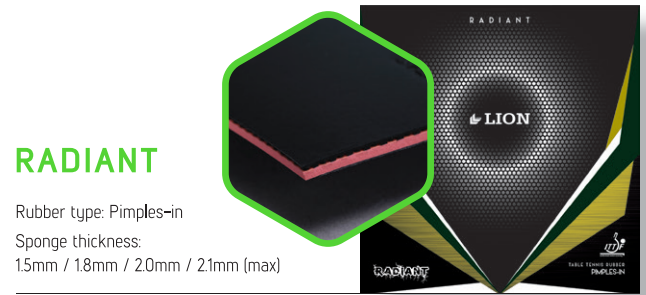

- This rubber uses a soft, elastic, rough pimple top-sheet combined with a hard yet highly elastic sponge.
- It's main strength is demonstrated when versing short and dangerous placements of blocks or undercut balls.

AGGRESSOR

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

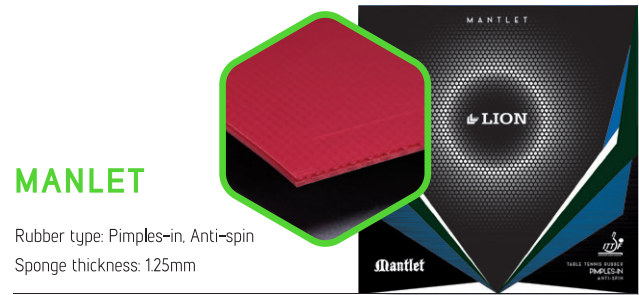

- Ideal for fast offensive player to break the opponent's defense.

RADIANT

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

- Has the adhesiveness of a Chinese rubber combined with the speed of German & Japanese rubber.
- Light weight.
- Ideal for looping and quick attack.

MANLET

Rubber type: Pimples-in, Anti-spin
Sponge thickness: 1.25mm

- It combines a soft dampening sponge with a thin & hard top sheet which has a slippery surface, but not completely frictionless.
- Slow and power absorbing
- Insensitive to incoming spin.

REBIRTH

Rubber type: Pimples-out
Sponge thickness: 0X / 1.2mm / 1.5mm

- 'EZLASTIC' technology: The pimples can bend to its maximum degree to absorb the energy of the coming ball and then push the ball away using the absorbed energy.
- It allows better control and easy blocking.

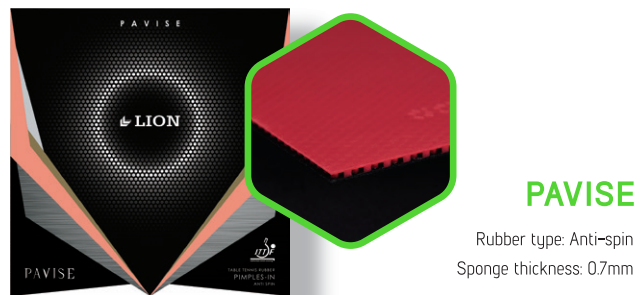

ALLROUNDER

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

- Light weight technology which increases softness to the rubber.
- Ideal for fast loops.

01 | RUBBER

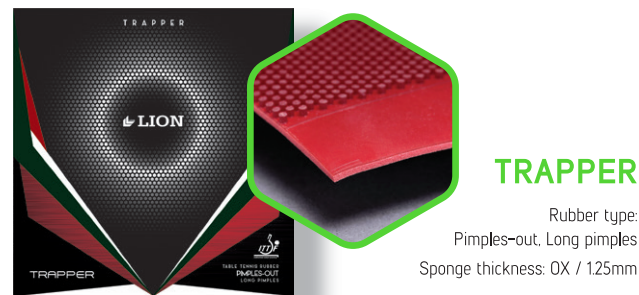

05

PAVISE

Rubber type: Anti-spin
Sponge thickness: 0.7mm

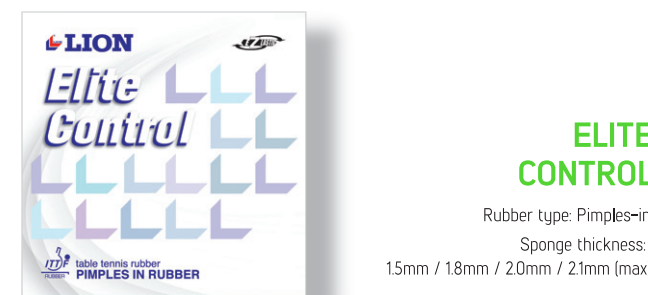

- New type of sponge which is uncommon in the market.
- Ball trajectory is completely unpredictable.
- The disruptive effect of this rubber can be compared to long pimple-out rubbers, but the speed is much slower and insensitive to incoming spin.

TRAPPER

Rubber type: Pimples-out, Long pimples
Sponge thickness: 0X / 1.25mm

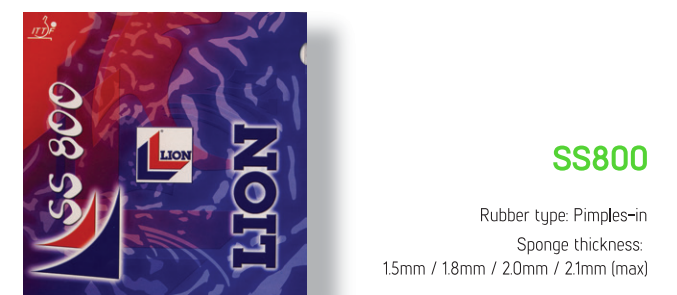

- Very tacky, medium soft and elastic rubber compound.
- Pimples space are reduced to increase grip.
- For players who play a modern and very versatile style of defense.
- Easy to generate spin when chopping and/or generating passive balls without spin is also possible.

ELITE CONTROL

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

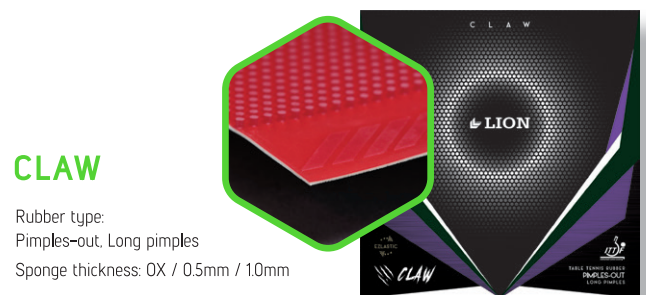

- Reinvented Chinese sticky rubber constructed with Western style rubber technology.
- Suitable for allround player.

SS800

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

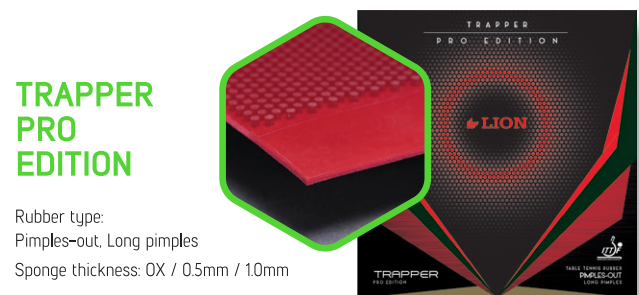

- To create a contrast of spin whilst maintaining good ball control.
- Has a sticky surface to provide maximum spin.

CLAW

Rubber type: Pimples-out, Long pimples
Sponge thickness: 0X / 0.5mm / 1.0mm

- 'EZLASTIC' technology: The pimples can bend to its maximum degree to absorb the energy of the coming ball and then push the ball away using the absorbed energy.
- A defensive rubber which can defeat your opponent in an unexpected way.

TRAPPER PRO EDITION

Rubber type: Pimples-out, Long pimples
Sponge thickness: 0X / 0.5mm / 1.0mm

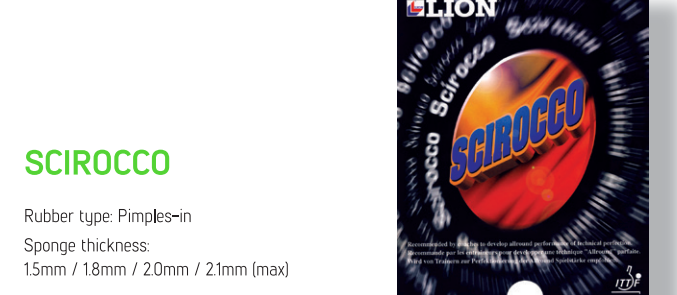

- Very tacky, medium soft and elastic rubber compound.
- Pimples space are reduced to increase grip.
- For players who play a modern and very versatile style of defense.
- Easy to generate spin when chopping and/or generating passive balls without spin is also possible.
- For more advanced player

XA900

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

- A high speed rubber whilst being lightweight.
- Easy to serve top spin and play fast loops.

SCIROCCO

Rubber type: Pimples-in
Sponge thickness:
1.5mm / 1.8mm / 2.0mm / 2.1mm (max)

- Combination of offensive & defensive rubber.
- It maximize control of the ball whilst still providing excellent spin & speed.
- Suitable for allround player.

ARATRON, ONI CARBOZONE MODE, MANTIS SPECTRUM

MODE - Allround+

- The outer layers are using veneers which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
A layer of basalt fleece is used closely to the inner core to improve rigidity.
An extreme ease of control due to its light weight design.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Koto (Thermo)
2+6 : Ayous (Thermo)
3+5 : Basalt Fleece
Center: Kiri
- Total thickness: +/- 6.00mm

ARATRON - Allround +

- A special composition of 7+3 blade with 2 layers of basalt fleece + a layer of 'Aratox fibre' at the core center.
- Similar to Aratron Defensive, the 2 extra layers of basalt fleece gives the additional power for offensive moves.

- Plywood : 9 PLY
- Plywood Construction:
1+9 : Koto
2+8 : Basalt Fleece
3+7 : Limba
4+6 : Awan
Center: Aratox
- Total thickness: +/- 6.70mm

ARATRON - Defensive

- A unique composition of hard outer to soft inner plies + a layer of 'Aratox fibre' at the core center which makes a superior control blade.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Koto
2+6 : Limba
3+5 : Awan
Center: Aratox
- Total thickness: +/- 6.00mm

02 | BLADE

MODE - Offensive+

- The outer layer is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.

- A layer of basalt carbon fibre is used to improve rigidity.
- More power than the basalt fibre Offensive- blade.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Koto (Thermo)
2+6 : Basalt Carbon
3+5 : Ayous (Thermo)
Center: Kiri
- Total thickness: +/- 6.30mm

MODE - Offensive-

- The outer layer is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.

- A layer of basalt fibre is used to improve rigidity.
- Slightly less power than the basalt carbon fibre Offensive+ blade, but it has the advantage of more stability.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Koto (Thermo)
2+6 : Basalt Fibre
3+5 : Ayous (Thermo)
Center: Kiri
- Total thickness: +/- 6.00mm

ONI - Offensive

- The result of this composition has created a very rigid offensive blade which can make powerful shot.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Akazie
2+6 : Yaya
3+5 : Aramid Carbon (Carbon Kevlar)
Center: Awan
- Total thickness: +/- 5.30mm

ONI - Allround+

- The composition of Carbon + Ayous has created a blade which can make good ball impact during a long rally.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Ayous
2+6 : Ayous
3+5 : Aramid Carbon (Carbon Kevlar)
Center: Ayous
- Total thickness: +/- 6.06mm

ONI - Offensive +

- The composition of Limba + Carbon + Kiri inner core has created an extra rigid blade that gives a player to make fast & powerful strike.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Limba
2+6 : Limba
3+5 : Aramid Carbon (Carbon Kevlar)
Center: Kiri
- Total thickness: +/- 6.40mm

CARBONZONE - Allround+

- The outer layer is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
- The composition of this blade can make good impacts during a long rally.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Limba (Thermo)
2+6 : Carbon Fabric
3+5 : Ayous
Center: Kiri
- Total thickness: +/- 6.40mm

CARBONZONE - Offensive

- The outer layer is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
- The composition of this blade has created a very rigid blade which can make very powerful shot.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Limba (Thermo)
2+6 : Ayous
3+5 : Carbon Fabric
Center: Kiri
- Total thickness: +/- 6.40mm

MANTIS - Allround

- The composition of this blade can make superb ball impact.

- Plywood : 5 PLY
- Plywood Construction:
1+5 : Hinoki
2+4 : Limba
Center: Ayous
- Total thickness: +/- 6.40mm

MANTIS - Allround+

- The composition of this blade gives a good balance of control and as well as fast plays.

- Plywood : 5 PLY
- Plywood Construction:
1+5 : Buche
2+4 : Limba
Center: Ayous
- Total thickness: +/- 6.40mm

CARBONZONE - Offensive+

- The outer layer is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
- The composition of this blade has created an extra rigid blade which can make very fast & powerful shot.

- Plywood: 7 PLY
- Plywood Construction:
1+7 : Limba (Thermo)
2+6 : Carbon Fabric
3+5 : Ayous
Center: Kiri
- Total thickness: +/- 6.40mm

MANTIS - Carbon Offensive

- This blade has a unique composition of African hard wood + carbon fiber. This combo have created a very rigid blade and allowing the player to make an extreme powerful shot.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Ovangkole
2+6 : Limba
3+5 : Carbon
Center: Kiri
- Total thickness: +/- 6.70mm

MANTIS - Offensive

- The composition of this blade gives a good balance of fast pace and high speed control.
- Can complete with the speed of a carbon blade.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Esche
2+6 : Tanne
3+5 : Kiri
Center: Awan
- Total thickness: +/- 6.70mm

SPECTRUM – Tidal Wave Offensive

- The center core is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
- A well balanced of wood + carbon composition blade which guarantees of making fast and speedy strikes.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Spruce
2+6 : Ayous
3+5 : Carbon Fleece
Center: Red Hinoki (Thermo)
- Total thickness: +/- 6.70mm

SPECTRUM – Ultraviolet Offensive-

- The center core is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
- The composition of this blade can make fast strike or the option to ease topspin from an opponent.

- Plywood : 7 PLY
- Plywood Construction:
1+7 : Spruce
2+6 : Ayous
3+5 : Kiri
Center: Ayous (Thermo)
- Total thickness: +/- 6.80mm

02 | B L A D E

SPECTRUM – Solar Flare Allround+

- The center core is using a veneer which has been specially treated by a technology called "Rigitec". This technology dehydrates wood and hence it improves the rigidity and reduces the weight of the natural timber.
- The composition of this blade has a soft touch which provides an amazing ball control.

- Plywood : 5 PLY
- Plywood Construction:
1+5 : Spruce
2+4 : Tanne
Center: Red Hinoki (Thermo)
- Total thickness: +/- 6.40mm

Special Full
Blister Box

for Blade

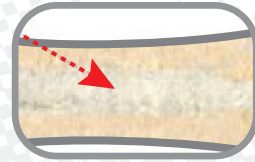

03

R U B B E R B A T

INNOVATIVE TECHNOLOGIES

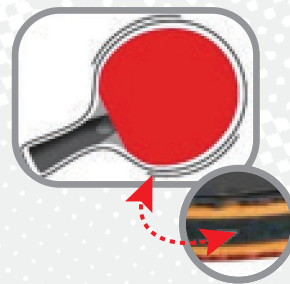

EQUIPPED WITH
FOAM CORE

A foam-filled handle moderates the vibrations for perfect ball control and precision.

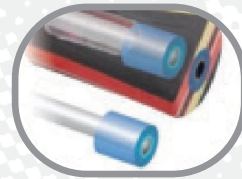

EQUIPPED WITH
EDGE GUARD SYS

Reduces the loss of energy for each strike on the ball.

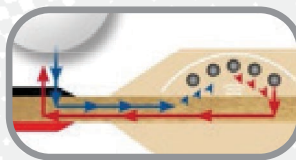

EQUIPPED WITH
SHOCK ABSORBER

The extremely rigid plastic tube absorbs the vibrations after each strike and creates stability on every shot.

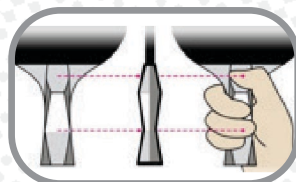

EQUIPPED WITH
KINETIC

Kinetic handle is an innovation which is embedded in the grip. Specific kinetic balls absorb the impact energy of the ball. At once they are moving in the strike direction and release the energy with the return. Hence the ball receives an additional acceleration. The result is a comfortable feeling with fast and powerful strikes.

EQUIPPED WITH
SMART GRIP

Smart.grip is the notch in the middle of the handle which simplifies the gripping enormously. The unique handle shape minimizes finger slipping and improves the grip contact to the hand palm. Especially for hobby players and players with small hands, the unique handle shape is a noticeable relief.

EQUIPPED WITH
STREAMLINE

Streamline is a unique handle which enhances the gripping for shake-hand table tennis grip user. It allows the index finger to securely grip on the curve of the handle tip.

PACKAGING FOR RUBBER BAT

Standard Inlay Card Packaging

Special Cardboard Box Packaging

Special Blister Box Packaging

- > Rubber type: Pimples-out
- > Sponge thickness: No sponge
- > Plywood: 5 plies

TT-2000

TT-2002

WINNER

An entry level hard bat.

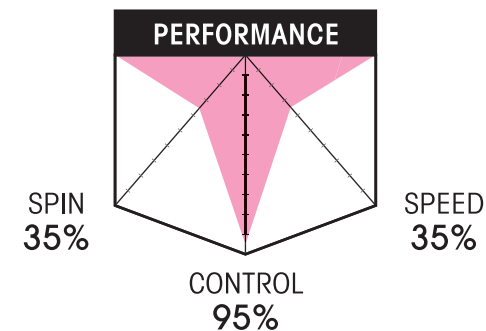

15

TT-2001

TT-2003

- > Rubber type: Pimples-in
- > ITTF approved rubber: "Lion, International"
- > Sponge thickness: 1.0mm
- > Plywood: 5 plies

TT-2004

TT-2006

POWER

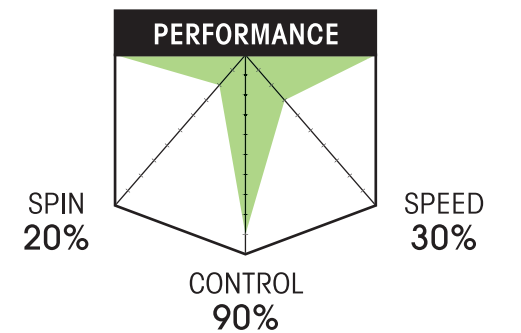

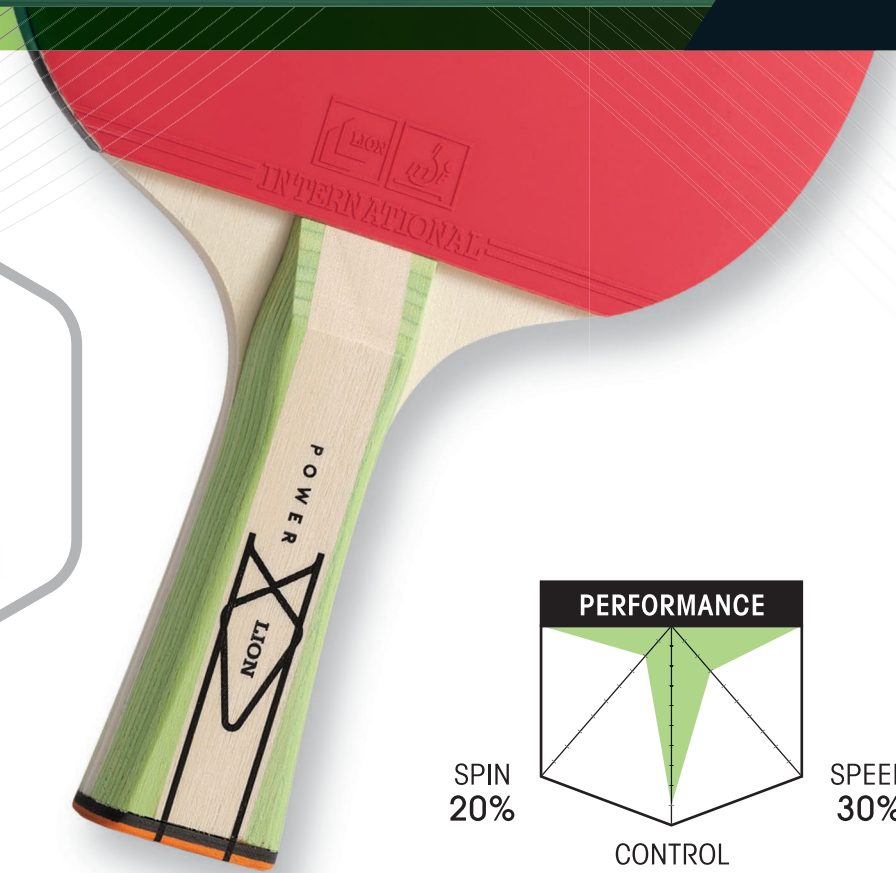

Ideal for learning & correcting strokes and building basic skills.

TT-2005

TT-2007

- > Rubber type: Pimples-in
- > ITTF approved rubber: "Lion, 1-Star, 003"
- > Sponge thickness: 1.5mm
- > Plywood: 5 plies

TT-2008

TT-2010

INTERNATIONAL

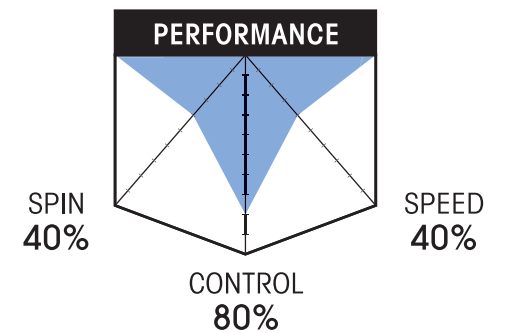

It offers an equilibrium level of spin, speed and control.

TT-2009

TT-2011

- > Rubber type: Pimples-in
- > ITTF approved rubber: "Lion, 2-Star, 004"

SUPER NATURAL
Single outdoor bat
Art no. TT-2050

- Rubber material (soft part): Thermoplastic Elastomer (TPE)
- Rubber material (hard part): Polypropylene (PP)
- Description:
 - Weatherproof outdoor bat which is UV and water resistant
 - "Power grip" technology on rubber surface
 - Lightweight
 - Suitable for recreational use
 - Spin 40% / Speed 50% / Control 50%

SUPER NATURAL
1 player outdoor set
Art no. TS-510

- 1 pc Outdoor Bat + 2 pcs Outdoor Balls
- Packaging type: Carry bag

SUPER NATURAL
2 player outdoor set
Art no. TS-512

- 2 pcs Outdoor Bats + 3 pcs Outdoor Balls
- Packaging type: Blister pack

SUPER NATURAL
2 player outdoor set

BATCOVER

Art no. TS-4001/BW; TS-4001/BY

- Nylon bat cover for 1 pc of TT Bat and 4 pcs of TT Balls.
- Colour option in Black / White or Black / Yellow.

BATWALLET

Art no. TS-4002/BW; TS-4002/BY

- Nylon bat wallet for 1 pc of TT Bat and 6 pcs of TT Balls.
- Colour option in Black / White or Black / Yellow.

BALLBAG

Art no. TS-5004

- Nylon + net ball bag for 144 pcs of TT Balls.
- It can also be used for storing other table tennis gears.

BALLBAG

Art no. TS-5003

- Nylon ball bag for 144 pcs of TT Balls.
- It can also be used for storing other table tennis gears.

MINI BAT KEYCHAIN

Art no. TA-701

- A wooden mini bat keychain with table tennis rubber and sponge.
- Size = 37 x 55 mm

MINIATURE TABLE TENNIS TABLE

Art no. TA-901

- Scale 1:10 table
- Made out of plywood
- Embossed custom logo

BATCOVER

Art no. TS-5001

- Nylon bat cover with a slim design for 1 pc of TT Bat and 3 pcs of TT Balls.

BATCOVER

Art no. TS-5002/Black; TS-5002/Blue
